

Scientists in Schools

incorporating Mathematicians in Schools

Scientists in Schools is a national program creating and supporting flexible, ongoing, professional partnerships between scientists, teachers and school communities. Scientists in Schools incorporates the sub-program Mathematicians in Schools.

Mentor students ... run a science fair ... set up a science or maths club ... link to current research ... promote careers in science and maths ... develop classroom experiments and activities ...

Participation is free and open to all scientists wanting to share their passion for science, and all teachers wanting to enhance science education in their classrooms.

Register today so we can find you a partner. Visit www.scientistsinschools.edu.au for ideas and information and to register online.
